AT BERWICK

ARTIST IMPRESSION

## ALIRA AT BERWICK IS CREATING SMART & SAVVY COMMUNITIES WITH OPTICOMM

Prior to the launch of Alira at Berwick in 2015, OptiComm was engaged to install optical fibre to all properties. OptiComm is an independent, licensed Australian Telecommunications carrier.

Their service provides all residents access to premium, superfast broadband internet, as well as Foxtel and related optical fibre services. The benefits of superfast broadband internet include the ability to:

- Download full length feature movies and music in minutes
- Play the latest online games
- Use multiple high bandwidth applications at the same time without slowdown
- Watch all free-to-air television channels (no antenna required)
- Install IPTV, Fetch TV and Foxtel

Each resident's nominated builder will need to prepare the home for OptiComm fibre connection as per the Cable Entry Guide at [www.opticomm.net.au](http://www.opticomm.net.au). Residents must have their Certificate of Occupancy to connect their home to OptiComm.

Structured cabling of your home is optional, but highly recommended, as it enables internet, telephone, TV and other services to be distributed throughout your house.

It is recommended you arrange a quote from your builder at the start of the construction phase as the cabling process takes place at the framework stage of construction.
